

Product Info RS - 2000 maneuverable Troop Parachute

NSN: 1670-12-287-6689

Maneuverable – stays for:

- A neutral canopy without self drive (parallel jumps from both side doors possible)
- quick canopy turns possible (appr. 6 sec. for full turn)
- landing always forward (with the wind), so less dangerous for injuries
- horizontal forward speed can be partly or fully compensated by “braking” the canopy
- jumps upto 22 knots ground wind speed possible for experienced jumper

RS – 2000 TECHNICAL SPECIFICATIONS:

Canopy area / diameter	85 m² / 35 ft
No. of gores/suspension line	26
Max. Payload	160 kg (354 lb)
Jumpers max. weight with parachutes	170 kg (375 lb)
Max. Exit Velocity	280 km/h (150 KEAS)
Min. Exit Altitude	150 m (500 ft)
Rate of descent (100 kg payload)	4,2 m/s (14 ft/sec)
Time for 360° Turn	appr. 6 s
Self Drive / steereability	no / yes
Landing direction	Running with the wind
System weight	14 kg

RS – 2000 combines the traditional mass-jump canopy with the advantage of a steerable parachute. Let’s jump, even if other parachutes are still grounded because of too much ground wind.
